Joint Use Agreement (JUA) Process
October 2012

When a party is interested in using DOTD right-of-way and a DOTD permit is not applicable, then the party may request a JUA.

The JUA process typically follows this order with few exceptions:

1. Applicant sends Intent Request documents (letter & sketch of proposed area) to DOTD.
2. Site Visit/Walk Through with applicant, DOTD representatives, and Federal Highway Administration (FHWA) as applicable.
3. Research of location by DOTD Real Estate Section for expropriation or excess property status.
4. Conceptual review and approval by DOTD district and DOTD sections as applicable.
5. Assessment by DOTD Environmental section.
6. Conceptual review and approval by FHWA.
7. Applicant sends Metes and Bounds Survey (3 stamped sets). It is best to get conceptual approvals completed first since the applicant pays for the survey.
8. Annual lease fee determination from DOTD Real Estate Section.
9. Review and approval of draft JUA contract by DOTD and FHWA as applicable.
10. 3 original JUA's signed by applicant.
11. 3 original JUA's signed by DOTD HQ Permits Engineer and FHWA as applicable.
12. Applicant submits lease payment. Wait for DOTD notification before sending check because first payment may be prorated based on final signatures.
13. DOTD executes JUA and sends one original to applicant.
14. DOTD Districts will permit all work on the JUA sites.

The following documents may be accessed from the LA DOTD website:

- JUA rules from the Louisiana Administrative Code (LAC) Title
- Metes and Bounds Survey example
